SUMMARY

Computer Science undergraduate (AI/ML specialization) with hands-on experience building full-stack web applications using React, Node.js, Express.js, and MongoDB/SQL. Skilled in developing REST APIs, authentication systems, and MVC-based backends, with additional experience integrating AI/ML models into production-style applications. Seeking a Software Developer / Backend Developer role to apply full-stack development and problem-solving skills.

EDUCATION

Meerut Institute of Engineering and Technology (MIET), Meerut, Uttar Pradesh	2023 – 2027
Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Machine Learning)	
KV Public School, Meerut	2022
Class XII, CBSE — 85%	
KV Public School, Meerut	2020
Class X, CBSE — 82.8%	

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Frontend: HTML, CSS, JavaScript, React, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs, MVC Architecture, CRUD Operations, Authentication & Authorization

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, VS Code, Render (Deployment)

Other: Data Structures & Algorithms, AI/ML Model Integration, Prompt Engineering

PROJECTS

Agentic Business Intelligence Multi-Lingual SQL Analyst | *React, Node.js, Express.js, SQL, AI/ML Model Integration*

- Architected an agentic business-intelligence system that converts natural-language queries into SQL across multiple languages, enabling users to query relational databases without writing SQL.
- Owned the full development lifecycle as final-year major project, including backend architecture, React-based frontend, database design, and integration of AI models for automated SQL generation and reporting.

AI-Powered Crop Optimization & Prediction Platform | *Node.js, Express.js, MongoDB, AI/ML Model Integration*

- GitHub: <https://github.com/priyanshu2169/crop-prediction-and-optimization>
- Engineered the backend of a smart-farming web application using Node.js, Express.js, and MongoDB to handle agricultural data processing and storage.
- Built the complete frontend and integrated AI/ML models to deliver crop prediction, disease detection, fertilizer suggestions, and yield prediction for data-driven agricultural decisions.

Wanderlust — Airbnb Clone | *HTML, CSS, Bootstrap, JavaScript, Node.js, Express.js, MongoDB, Render*

- GitHub: <https://github.com/priyanshu2169/Major-Project>
- Developed a full-stack rental-booking web application inspired by Airbnb, covering listing creation, browsing, and end-to-end booking workflows.
- Implemented user authentication, authorization, input validation, multilingual support, and search functionality following MVC architecture; deployed the application on Render.
